#	Question	Answer
	What is the address of the house on this street which looks the most out of place architecturally?	49 (this was a bad question that I apologize for; I thought it was obvious that #49 was the out of place house (looks like a 50's era suburban cube-shaped colonial, on a street with classy old city houses), but I did the course today and as I came onto the street viewing it like a competitor might, I realized there is a lot of variety in the houses on the street and it's much more subjective which one stands out. So any address given that was that of any house on the street was accepted.)
